### Installing the Cordless Headset on Your PC

Note: the cordless headset can only be used with one device at a time, either the PC or the Mobile Phone.

**Installation Instructions for Windows® XP, Windows® Vista™**

- Insert the CallCentral™ software CD. If the installation window does not automatically appear, please run the set-up file from the CD.
- Wait until prompted by the installation wizard, and then connect the USB receiver to the convenient extender stand (preferred) or to an available USB port on your computer.
- Turn on the headset by pressing on the multifunction button for 3 seconds.
- Wait for approximately 20 seconds for the receiver and headset to establish a wireless connection.
- When connected you should see 2 repeating blue flashes on the USB receiver and 3 repeating blue flashes on the headset.
- Complete the Audio Tuning Wizard. Make sure that the audio devices selected match your preferences. Most users want their "Media Speaker" device to be set to the soundcard or USB speakers.
- If you do not have Skype™, please download it from www.skype.com. Skype™ cannot be used for emergency calling.

**Special Installation Instruction for Windows 2000**

- Important! Before continuing, download the latest version of Microsoft DirectX™ before proceeding. Go to the Microsoft website for Microsoft DirectX.
- Insert the CallCentral™ software CD. If the installation window does not automatically appear, please run the set-up file from the CD.
- Wait until prompted by the installation wizard, and then connect the USB receiver to the convenient extender stand (preferred) or to an available USB port on your computer.
- During the installation process, you will be asked to reboot your computer.
- After re-booting, you must launch CallCentral™ from your desktop in order to complete the installation and set-up process.
- Turn on the headset by pressing on the multifunction button for 3 seconds.
- Wait for approximately 20 seconds for the receiver and headset to establish a wireless connection.
- When connected you should see 2 repeating blue flashes on the USB receiver and 3 repeating blue flashes on the headset.
- Complete the Audio Tuning Wizard. Make sure that the audio devices selected match your preferences. Most users want their "Media Speaker" device to be set to the soundcard or USB speakers.
- If you do not have Skype™, please download it from www.skype.com. Skype™ cannot be used for emergency calling.

### Installation du casque sans fil sur un ordinateur

Remarque: le casque sans fil peut être utilisé avec un seul dispositif à la fois, c'est-à-dire un ordinateur ou un téléphone mobile.

**Instructions d'installation pour Windows® XP, Windows Vista™**

- Coloque el CD del logiciel CallCentral™ en la unidad. Si la ventana de instalación no aparece automáticamente, ejecute el fichero de instalación ubicado en el CD.
- Espera hasta que el asistente de instalación le indique que conecte el conector USB a la base adecuada (preferible) o a un puerto USB de la computadora.
- Pulse durante 3 segundos el botón de varias funciones para encender el audífono.
- Espera durante 20 segundos para que el receptor y el audífono establezcan una conexión inalámbrica.
- Al establecerse la conexión debería ver 2 destellos azules repetidos en el receptor USB y 3 destellos azules repetidos en el audífono.
- Completa el Asistente para el ajuste de audio. Asegúrese de que los dispositivos de audio seleccionados coincidan con sus preferencias. La mayoría de los usuarios desean que su dispositivo "de bocinas multimedia" sea la tarjeta de sonido o las bocinas USB.
- Si no tiene Skype™, descárguelo desde www.skype.com. Skype™ no se puede utilizar para llamadas en caso de emergencia.

**Instructions d'installation particulière pour Windows 2000**

- Important! Téléchargez la dernière version de Microsoft DirectX™ avant de continuer. Accédez au site Microsoft pour Microsoft DirectX.
- Coloquez le CD du logiciel CallCentral™ dans la unité. Si la fenêtre d'installation ne s'affiche pas automatiquement, exécutez le fichier d'installation situé sur le CD.
- Espera jusqu'à ce que l'assistant de l'installation le indique que vous connectez le connecteur USB à la base adéquada (préférable) ou à un port USB de la computadora.
- À l'heure du procédé de l'installation, il vous sera demandé de redémarrer votre ordinateur.
- Après le redémarrage, vous devrez lancer CallCentral™ depuis l'écran pour compléter le processus d'installation et de configuration.
- Appuyez sur le bouton de tension sur le multifonction pendant 3 secondes.
- Attendez environ 20 secondes pour que le récepteur et l'audífono établissent une connexion sans fil.
- Si la connexion est établie, vous devriez voir 2 clignotements bleus répétés sur le récepteur USB et 3 clignotements bleus répétés sur l'audífono.
- Completez l'assistant de réglage audio. Vérifiez que les périphériques audio sélectionnés correspondent à vos préférences. La plupart des utilisateurs souhaitent que le dispositif de haut-parleurs multimédia soit défini sur la carte son ou sur les haut-parleurs USB.
- Si vous ne possédez pas Skype™, téléchargez-le à l'adresse www.skype.com. Skype™ ne se peut pas utiliser pour appeler les services d'urgence.

### Instalación del audífono inalámbrico en la PC

Nota: el audífono inalámbrico sólo se puede utilizar con un dispositivo en un momento dado, ya sea la PC o el teléfono móvil.

**Instrucciones de instalación para Windows® XP, Windows Vista™**

- Insera el CD del software CallCentral™ en la unidad. Si la ventana de instalación no aparece automáticamente, ejecute el fichero de instalación ubicado en el CD.
- Espera hasta que el asistente de instalación le indique que conecte el conector USB a la base adecuada (preferible) o a un puerto USB de la computadora.
- Pulse durante 3 segundos el botón de varias funciones para encender el audífono.
- Espera durante 20 segundos para que el receptor y el audífono establezcan una conexión inalámbrica.
- Al establecerse la conexión debería ver 2 destellos azules repetidos en el receptor USB y 3 destellos azules repetidos en el audífono.
- Completa el Asistente para el ajuste de audio. Asegúrese de que los dispositivos de audio seleccionados coincidan con sus preferencias. La mayoría de los usuarios desean que su dispositivo "de bocinas multimedia" sea la tarjeta de sonido o las bocinas USB.
- Si no tiene Skype™, descárguelo desde www.skype.com. Skype™ no se puede utilizar para llamadas en caso de emergencia.

**Instrucciones de instalación adicionales para Windows 2000**

- Importante! Antes de continuar, descargue la versión más reciente de Microsoft DirectX™.
- Acceda al sitio Microsoft para Microsoft DirectX.
- Coloque el CD del software CallCentral™ en la unidad. Si la ventana de instalación no aparece automáticamente, ejecute el fichero de instalación ubicado en el CD.
- Espera hasta que el asistente de instalación le indique que conecte el conector USB a la base adecuada (preferible) o a un puerto USB de la computadora.
- Durante el procedimiento de instalación, se le indicará que reinicie la computadora.
- Después del reinicio, debe iniciar CallCentral™ desde el escritorio para completar el proceso de instalación y configuración.
- Pulse durante 3 segundos el botón de varias funciones para encender el audífono.
- Espera durante 20 segundos para que el receptor y el audífono establezcan una conexión inalámbrica.
- Al establecerse la conexión debería ver 2 destellos azules repetidos en el receptor USB y 3 destellos azules repetidos en el audífono.
- Completa el Asistente para el ajuste de audio. Asegúrese de que los dispositivos de audio seleccionados coincidan con sus preferencias. La mayoría de los usuarios desean que su dispositivo "de bocinas multimedia" sea la tarjeta de sonido o las bocinas USB.
- Si no tiene Skype™, descárguelo desde www.skype.com. Skype™ no se puede utilizar para llamadas en caso de emergencia.

### PC Function Guide

How to	What you do	What you see	What you hear
Turning on Headset	Press MFB on Headset for 3 seconds.	5 blue LED flashes, then slow blue LED flashes.	Brief low-to-high tone.
Connecting to USB Receiver	Turn on Headset, plug in USB Receiver to USB port. Wait 25 seconds.	No tone.	Melody increases in volume.
Incoming Call Notification	No action.	3 repeating blue flashes on receiver.	Answering Call
Answering Call on Headset	Pres MFB on Headset briefly.	Melody on Headset.	4 repeating blue flashes on Headset.
Answering Call on PC	Click on-screen button with mouse to answer call.	Normal call audio.	4 repeating blue flashes on Headset.
Ending Call from Headset	Press MFB on Headset briefly.	Single beep.	3 repeating blue flashes.
Ending Call on PC	Click on-screen button with mouse to end call.	Single beep.	3 repeating blue flashes on Headset.
Ending Call on PC	Press MFB on Headset briefly.	Single beep.	2 repeating blue flashes on receiver.
MIC Mute-On	Press and hold Vol (+) and Vol (-) buttons simultaneously for 3 seconds.	Beep every 30 seconds.	Alternating blue/red LED flashes, blue LED when paired.
Ending MIC Mute	Press and hold Vol (+) and Vol (-) buttons simultaneously for 3 seconds.	No beeps.	Single beep.
Placing Outgoing call from PC	Click on-screen button with mouse to place outgoing call.	Normal call audio.	4 repeating blue flashes on Headset; Solid blue LED on receiver.
Low Battery Notification	No action.	Repeating red flashes on Headset.	Beep every 30 seconds.
Standby or Connected Notification	No action.	3 repeating blue flashes on Headset; 2 repeating blue flashes on receiver.	No audio.
Turning Off Headset	Press MFB for 2 seconds.	5 red LED flashes on Headset; Slow repeating single blue flash on receiver.	High to low tone.
Charging Headset	Plug AC adapter into electrical outlet.	Continuous red LED.	No beeps.
Disconnect from PC	Select disconnect in the CallCentral™ software.	1 repeating blue flash on Headset; 1 repeating blue flash on receiver.	No beeps.
Reconnect to PC	Disconnect from phone. Select connect in the CallCentral™ software.	3 repeating blue flashes on headset; 2 repeating blue flashes on receiver.	No tone.

### Mobile Phone Function Guide

How to	What you do	What you see	What you hear
Turning on Headset	Press multi-function button (MFB) briefly.	5 blue LED flashes, then slow blue LED flashes.	Brief low-to-high tone.
Incoming Call Notification	No action.	3 repeating blue flashes.	Melody increases in volume.
Answering Call	Pres MFB briefly.	Single beep when answered.	4 repeating blue flashes.
Call in Progress	No action.	4 repeating blue flashes.	No beeps.
Ending Call	Pres MFB briefly.	3 repeating blue flashes.	Single beep.
To Pair	From OFF state, press and hold MFB button for 10 seconds.	Alternating blue/red LED flashes, blue LED when paired.	Single high-low tone.
Standby or Connected	No action.	1 or 3 repeating blue flashes.	No audio.
Voice Dialing	Press MFB when in standby or connected.	4 repeating blue flashes.	Single beep.
MIC Mute-On	Press and hold Vol (+) and Vol (-) buttons simultaneously for 3 seconds.	4 repeating blue flashes.	Single beep.
Ending MIC Mute	Press and hold Vol (+) and Vol (-) buttons simultaneously for 3 seconds.	4 repeating blue flashes.	Single beep.
Placing Outgoing call from PC	Click on-screen button with mouse to place outgoing call.	Normal call audio.	4 repeating blue flashes on Headset; Solid blue LED on receiver.
Low battery	No action.	Repeating red flashes on Headset.	Beep every 30 seconds.
Standby or Connected	No action.	3 repeating blue flashes on Headset; 2 repeating blue flashes on receiver.	No audio.
Turning Off	Press MFB for more than 3 seconds.	5 brief red flashes.	High-to-low tone.
Charging Notification	No action.	Continuous red LED.	No audio.
Enter Night Mode	Press all three buttons for 3 seconds.	Nothing.	4 quick tones.
Release Night Mode	Press all three buttons for 3 seconds.	3 blue LED flashes.	4 quick tones.

### Handsfree Functions - supported by phones that have this feature

Last Number Redial  
Press Volume (-) for 3 more times.  
4 repeating blue flashes.  
A double beep.

Incoming Call Reject  
Press MFB for more than 3 seconds.  
4 repeating blue flashes.  
A double beep.

These features are supported by phones that support Handsfree Mode.

Note: MFB stands for multi-function button; CDMA and GSM phones handle these functions differently. Please check with your service provider and mobile phone vendor for details.

1

### Charging the Headset

- Connect the power adapter to your headset.
- Plug the power adapter into an electrical outlet.
- The LED will be red when charging. If the LED is not red the connection is not sufficient.
- When the LED turns off, your headset is fully charged. Charging can take up to 4 hours. Note: Talk time 7 hours, Standby 300 hours.

### Chargement du casque

- Mettez le casque hors tension et branchez l'adaptateur secteur sur le casque.
- Branchez l'adaptateur secteur sur une prise électrique.
- Si le témoin est orange, cela indique que le chargement est en cours. Si la connexion est mauvaise, le témoin LED orange ne s'allume pas.
- Lorsque le témoin s'éteint, cela signifie que le casque est entièrement chargé. Ce premier chargement dure environ 4 heures.

Remarque: autonomie d'environ 7 heures en conversation, 300 heures en mode veille

### Cargar el casco telefónico

- Apareja el casco telefónico y conecta el adaptador de alimentación.
- Conecta el adaptador de alimentación a una toma de corriente.
- Durante la carga, la luz del diodo será naranja. De no ser así, la conexión no es suficiente.
- Cuando el indicador lumínoso se apaga, el casco telefónico está cargado. El proceso de carga puede tardar hasta 4 horas.

Nota: Tiempo en conversación: 7 horas. Tiempo en espera: 300 horas.

### Using CallCentral™

CallCentral™ tiene una interfaz de "cinta" a la que se puede acceder mediante un doble click en el icono situado en la bandeja del sistema. Haga click en el botón derecho del mouse para acceder a la "Ayuda".

This connection will enable you to listen to music through the cordless headset provided that you also open the "Setup Wizard" and select the "cordless headset as your "Music and Media" output device. The "Always on" wireless connection will be forced to the headset and will not play through the speakers. This mode will shorten the length of time necessary before re-charging the headset. Therefore, this mode should only be used when necessary. Also note that most music players must be restarted after a new audio output device is selected.

Nota: Esta conexión permite escuchar música a través del auricular, siempre que también elija el asistente de configuración de los dispositivos y seleccione el auricular como dispositivo de salida de "música y multimedia". Una conexión inalámbrica "siempre conectada" una vez activada consumirá más energía que el modo estándar (modo (red)) y, por tanto, acortará el tiempo necesario entre cargas del auricular. Por tanto, este modo sólo deberá usarse cuando realmente sea necesario. Tenga también en cuenta que es necesario reiniciar la mayoría de reproductores de música después de seleccionar un dispositivo de salida de audio nuevo.

Nota: Estas funciones están disponibles en teléfonos que admiten el modo de manos libres.

Nota: Estas funciones se gestionan de forma diferente con teléfonos CDMA y GSM. Para más información, consulte con el proveedor de su servicio telefónico y con el fabricante del teléfono.

2

### Comfort & Fit

- Rotate the rubber earpiece around the headset for use on either ear.
- Place the earpiece behind your ear and rotate the product to your comfort.

—OR—

- With one hand, hold earpiece out from the headset and slide product over your ear.
- Rotate microphone boom so it is pointing toward the corner of your mouth.

### Confort et tenue

- Faites pivoter la pièce en caoutchouc autour du casque pour l'utiliser sur l'oreille de votre choix.
- Placez l'oreille derrière votre oreille et faites pivoter le casque de manière à le placer confortablement.

—OU—

- D'une main, écartez l'oreillelet du casque et glissez-le sur votre oreille pour le mettre en place.
- Orientez le micro vers la commissure de vos lèvres.

### Comodidad y ajuste

- Gire la pieza auricular de goma para colocarla en la posición requerida, según deseas usar la oreja derecha o la izquierda.
- Coloque la pieza auricular detrás de la oreja y manipule el dispositivo hasta encontrar la posición más cómoda para usted.
- O BIEN—
- Separé la pieza auricular del casco y colóquela sobre la oreja.
- Gire la varilla de micrófono para dirigirla hacia un extremo de la boca.

**4**

**Pairing with a Bluetooth® Enabled Phone**  
To pair your headset to a Bluetooth® enabled mobile phone  
If connected to the USB receiver (PC), disconnect (see Step 3).

- Turn on your phone. Make sure the battery is charged in both devices. Turn off the headset.
- Press and hold the multi-function button until the headset indicator light flashes blue and red (about 10 seconds).
- The headset is now in Pairing mode. Release the button. The indicator light will continue flashing red and blue.
- Follow the pairing instructions for your Bluetooth® phone. Typically, this is done by going to a "setup" or "connect" menu on your phone and then selecting the options to "discover" Bluetooth® devices.
- For more details, refer to your phone user guide or contact the phone's manufacturer.
- Your phone should find the "Logitech HS5-Vxx" headset. Confirm to pair.
- Your phone should prompt you for a passkey or PIN. The PIN/passkey is: **0000**.
- If pairing was successful, the headset LED will flash blue.
- If pairing fails, turn the headset and phone off and repeat the process.
- Red and blue flashing will return to stand-by mode (blue flashing LED) if not paired in 2 minutes. For more details, please see User's Manual.

**Headset Functions**

**Turning the headset on and off:** Push and hold the multi-function button for 3 seconds. A blue LED will flash 5 times when on. Press and hold for 3 seconds to turn off and a red LED will flash 5 times when off.

**Answering/ending a call:** Press the multi-function button (short press).

**Muting a call:** Press and hold both Volume up and Volume down at the same time for 3 seconds. A repeating beep at 30 second intervals will indicate that the microphone is muted. Repeat to discontinue mute.

**Couplage à un téléphone compatible Bluetooth®**  
Pour coupler votre casque à un téléphone mobile compatible Bluetooth®.  
Si l'est connecté au récepteur USB (PC), déconnectez-le (voir Étape 3).

1. Allumez votre téléphone. Vérifiez que la batterie des deux dispositifs est chargée. Mettez le casque hors tension.
2. Appuyez sur le bouton multifonction jusqu'à ce que le témoin lumineux du casque clignote en rouge et bleu (pendant environ 10 secondes).
3. Le casque est alors en mode de couplage. Relâchez le bouton. Le témoin continue de clignoter en rouge et bleu.
4. Suivez les instructions de couplage de votre téléphone Bluetooth®. Il s'agit généralement de sélectionner le menu de configuration ou de connexion de votre téléphone, puis les options permettant de rechercher les dispositifs Bluetooth®.
5. Pour plus d'informations, reportez-vous à la documentation accompagnant votre téléphone mobile ou contactez le fabricant du téléphone.
6. Votre téléphone doit détecter le casque "Logitech HS5-Vxx". Confirmez pour effectuer le couplage.
7. Il vous est ensuite demandé d'entrer un code d'accès (Passkey ou PIN) sur votre téléphone. Ce code est: 0000.
8. Si le couplage réussit, le témoin du casque clignote en bleu.
9. Si le couplage n'est pas effectué dans les 2 minutes, le témoin lumineux qui clignotait en rouge et bleu se met à clignoter en bleu (mode Veille).
10. Pour plus d'informations, veuillez vous reporter au manuel de l'utilisateur.

**Fonctions du casque**

**Mise sous et hors tension du casque:** Appuyez sur le bouton multifonction pendant 3 secondes. Un témoin bleu clignote cinq fois à l'activation. Maintenez le bouton enfoncé pendant trois secondes et un témoin clignote cinq fois en rouge à la désactivation.

**Réception/Fin d'appel:** Appuyez sur le bouton multifonction (pression courte).

**Sourdinge:** Appuyez simultanément sur les touches Volume + ou Volume - et maintenez-les enfoncées pendant 3 secondes. Un bip répétitif toutes les 30 secondes indique que le son du micro est coupé. Répétez l'opération pour désactiver la sourdinge.

**Emparejamiento con un teléfono móvil que tenga tecnología Bluetooth®**  
Para emparejar el auricular con un teléfono móvil que tenga tecnología Bluetooth®.  
Si está conectado al receptor USB (PC), desconéctelo (vea el paso 3).

1. Encienda el teléfono. Asegúrese de que la pila o batería está cargada en ambos dispositivos. Apague el casco telefónico.
2. Pulse el botón de varias funciones y manténgalo pulsado hasta que la luz del indicador del casco telefónico parpadee en azul y rojo (unos 10 segundos).
3. El casco telefónico está ahora en modo de emparejamiento. Suelte el botón. El indicador continuará parpadeando en rojo y azul.
4. Siga las instrucciones de emparejamiento para el teléfono Bluetooth®. Normalmente, seleccionará el menú de configuración o conexión de su teléfono, y luego las opciones que permiten buscar los dispositivos Bluetooth®.
5. Para más información, consulte la guía del usuario de su teléfono móvil o póngase en contacto con el fabricante del teléfono.
6. Si su teléfono detecta el casco telefónico "Logitech HS5-Vxx". Confirme para efectuar el emparejamiento.
7. Si su teléfono le pide introducir un código de acceso (Passkey o PIN) sobre su teléfono. El código es: 0000.
8. Si el emparejamiento ha tenido éxito, el indicador luminoso del casco telefónico parpadea en azul.
9. Si el emparejamiento no se ha efectuado en los 2 minutos, el indicador luminoso que parpadeaba en rojo y azul se ha puesto a parpadear en azul (modo Veille).
10. Para más información, consulte la documentación del usuario.

**Funciones del casco telefónico**

**Encendido y apagado del casco telefónico:** Pulse y mantenga pulsado el botón de varias funciones durante 3 segundos. Una luz azul parpadea cinco veces para indicar el estado encendido. Mantenga el botón pulsado durante 3 segundos para apagarlo. Una luz roja parpadea cinco veces para indicar el estado apagado.

**Réception/Fin d'appel:** Appuyez sur le bouton multifonction (pression courte).

**Sourdinge:** Appuyez simultanément sur les touches Volume + ou Volume - et maintenez-les enfoncées pendant 3 secondes. Un bip répétitif toutes les 30 secondes indique que le son du micro est coupé. Répétez l'opération pour désactiver le sourdinge.

**Safety**

**IMPORTANT SAFETY INSTRUCTIONS**

**CAUTION ELECTRIC SHOCK HAZARD**

- Only use attachments/accessories specified by the manufacturer.
- Keep all warnings.
- Follow all instructions.
- Do not use this apparatus near water.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug, damage to the apparatus, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- Do not block any ventilation openings, heat sinks, or other safety-related features.
- Do not push objects into apparatus vents or slots because fire or electric shock hazards could result.
- Ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, table cloths, or similar materials.
- Do not naked (open) flame sources, such as lighted candles, should be placed on or near the apparatus.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Use the correct power cord from the manufacturer or an authorized dealer.
- Avoid placing the apparatus near a radiator or heat source.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than 50 °C (122 °F).
- Do not expose the apparatus to temperatures lower than 0 °C (32 °F).
- Do not expose the apparatus to direct sunlight.
- Do not expose the apparatus to extreme humidity or sudden changes in temperature.
- Do not expose the apparatus to rain or moisture.
- Do not expose the apparatus to temperatures higher than
