- Very simple operation and sturdy design – ideal for sports enthusiasts and anyone on the go
- Practical clip to securely fasten the player to clothing or bags

T10 FM

Sturdy sports player for people on-the-go with a practical clip and impressive color display

iriver is moving in new directions with the T10 FM. Instead of increasingly smaller and more lightweight, this player has been specifically built for outdoor use. Its sturdy, practical design makes it the ideal companion for parachutists or half-pipe skaters as well as for people who have to tackle the daily crowds on public transport. Particularly the practical clip, which can be used to securely fasten the player to just about anything, makes it the perfect take-along music device for anyone who is active.

The color display not only simplifies navigation, it also visualizes the music with the coolest graphics. A regular "AA" battery powers the T10 FM for an amazing 53 hours, so that you won't need to replace the battery for several weeks, even when using the player a lot. No other player is so sturdy or has such staying power – and of course you can expect the perfect sound you are accustomed to getting from iriver.

iriver
