Time Shift function

Keep up with the action

Something unexpected happens in the heat of the action! Push the pause button, and the hard drive will record the rest of the programme. When you return, you can pick up where you left the action, while recording continues.

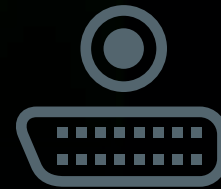

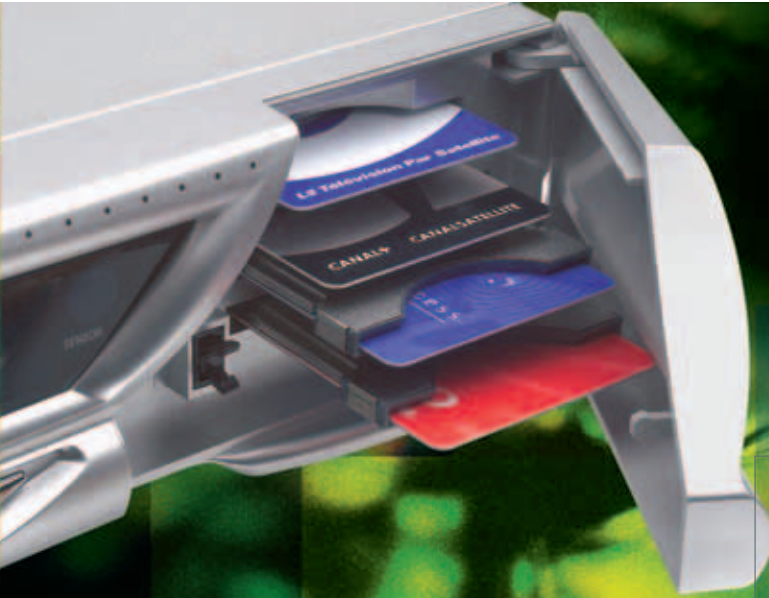

PAUSE

Designed for multi-media addicts, the ultra-silent internal 2.5" hard drive of this receiver will give you hours and hours of high quality digital programmes.

The revolutionary Xena® 1800 HD has the qualities of a true digital video recorder: Time Shift, markers to do away with advertisements, variable fast forward and rewind, quick motion reading, frame by frame, pause, freeze...

The piles of video recorders are a thing of the past, now is the moment for aesthetic refinement, the ultimate alliance of technology and power.

CONNECTORS

Multiple connections
to integrate your full multimedia environment.

Scart connector

UHF / VHF output

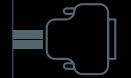

Audio / Vidéo
RCA output

IF/IF input
with loop through

S-VHS output

RS 232 Data port
for STB to PC
or STB to STB
connection

RECEPTION

Maximum evasion

3 embedded conditional access, 2 smart card readers
and 2 DVB common interface slots for your PCMCIA modules.

Software Interface

An organiser for your television programmes and recordings
(on the hard drive of the receiver or on the video recorder):

- the creation of 6 programmable favourites lists
- an interactive programme guide ...

Ultra-rapid zapping

Ergonomic and functional, the remote control gives you easy access
to the video and navigation within the menus.

USER-
FRIENDLINESS
