## Safety Precaution

Please read safety precaution before using your cellular phone. Precaution contains contents that prevent users from potential health and financial hazards. Read carefully and use the product accordingly. If the following regulation stated in precautions is not followed, you may be subject to penalties or may cause illegal conditions. For more information, refer to 'Health and Safety Precaution' described in the appendix of this manual.

#### **Traffic Safety**

Do not use a hand-held mobile phone while driving a vehicle. Follow traffic related regulations while driving. Using hand-held device while driving can be direct and indirect cause of accidents. If it is necessary to use a hand-held phone, park the vehicle before conversing or use hands-free/ear-microphone.

#### **Potentially Explosive Atmosphere**

Switch off your phone when in any area with a potentially explosive atmosphere and obey all signs and instructions.

#### Switch Off While Refueling

Users are advised to switch off the phone while at a refueling point (gas station).

#### Switch Off in Aircraft

Electronic frequency generated from your cellular phone can influence electronic equipments that are not radio frequency shielded on an airplane and cause dangerous conditions.

#### Switch Off in Hospitals

Follow any regulations or rules in force. Switch off your phone near medical equipment. All wireless phones may be subject to interference that can influence the performance of medical equipment. Consult with the medial equipment manufacturer to assure the equipment is safe from high-frequency energy.

#### **Special Regulations**

Meet any special regulations in force in any area and always switch off your cellular phone whenever the use if forbidden such as concert hall, public area, and etc. Also, avoid using your phone where the use of phone can cause serious danger (hospital, potentially explosive area, while driving).

#### **Effective Phone Usage**

Please use your cellular phone for proper purpose.

#### Backup Data from Cellular Phone

Phone numbers, message and data stored in the phone book can be lost due to user's negligence. When cellular phone may be damaged and your data may be lost while repairing. Back up important data in safe medium. We do not take responsibility for damages incurred due to data loss.

#### Keep Cellular Phone in Dry Place

This cellular phone is not water-proof. Keep it in dry place.

#### **Cellular Phone and Frequency Interference**

All cellular phone are subject to radio frequency interruption. Radio frequency interference may influence the performance of your cellular phone.

#### **Accessories and Batteries**

Use only VK-approved accessories and batteries. If original accessories are not used, battery can explode or damage your cellular phone.

#### **Approved Service Center**

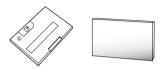

When repairing your cellular phone, use only VK approved service centers.

#### **Emergency Calls**

The cellular phone needs to be switched on and had to be in service area. If other functions are in use, finish the other function by pressing END key. Then, press emergency number and press CALL button. Describe your location and the emergency condition. Emergency call does not end until you hang up.

# Basic Operation

#### Switching On/Off

Switch On: Hold down 🚱 button for 2 seconds or longer. If no SIM card is inserted in the cellular phone, a message window that states no SIM card is inserted is displayed. In this case, only emergency call can be used and the rest of

functions cannot be used.

If you are asked with password, enter the password and press 'OK' button.

The default password is set to '0000'.

When your cellular phone is set to Manner mode, the cellular phone vibrates as it is switched on.

Switch Off: Hold down 🕟 button for 2 seconds.

#### Making a Call

#### [Dialing]

- 1. Enter area code and phone number in standby mode.
- 2. Press 👣 button.

When you entered a wrong number, press ••• button to erase one number at a time

Hold down ••• button for 2 seconds to erase all entered numbers

When the call receiver is on the line or did not answer your call, the number is automatically redialed.

#### [Making a Call from Contacts]

You can make a call without entering phone number. Using phone numbers that are pre-stored, you can make a call. Press the right soft key to enter the contacts.

For more details on contacts, see page 29.

#### [Latest Call List]

You can make a call using the latest call list.

- 1. Press button shortly to display the latest call list in order of call time.

- 2. Select desired phone number using up/down button of key.
- 3. Press 👣 button.

For more detail, refer to Call History on page 69.

#### [Speed Dialing]

You can make a call using speed dialing.

Using number keys from 2 to 9, hold down the pre-stored speed dial number for 2 seconds.

If the phone number is stored in your cellular phone hold down the speed dial number.

If the phone number is stored on SIM card press the speed dial number first, press  $(\#^n)$  key, and press  $(\#^n)$  key. Speed dial number can be configured from 2 to 99.

For more detail, refer to Contacts on page 29.

#### [Making an International Call]

- 1. Holding down 0 button for 2 seconds displays  $oldsymbol{+}$  symbol.
- Enter the country code, area code, and phone number after + symbol.
- 3. Press 🗥 button.

#### Answering a Call

1. When there is an incoming call, either bell tone or vibration is activated depending on the configuration.

have stored for the phone number is displayed.

- 2. Press 👣 button.
- To hang up, Press button.
   If a caller ID service is activated and if the incoming phone number is already stored in your contacts, the name you

### Hanging up

Press 🕖 button to hang up.

### **Options During a Call**

You can use a variety of functions while talking on the phone.

### [Call Standby]

This function is available only when a network service is provided. When this function is used, Using this function, you can make a call or answer other calls during any time of call.

Confirm that you have flashed back to the previous call and press button to go back to the previous call.

### [Ending a Call]

End a call during a Call: This function ends the current call.

End a call on hold: This function ends a call on hold.

End all calls: This function ends both the current call and the call on hold.

#### [Flash]

When there is a new incoming call, you can either answer the call or put it on hold. Also, you can switch the current call with the new incoming call.

#### [DTMF Function]

You can enter numbers and send it during a call. In case where you need to enter a long sequence of numbers such as paging, ARS, or Telebanking, you can store the frequently used numbers (social security number or bank account number) to send them with greater convenience.

#### [Switching Microphone Mute]

You can turn off the microphone so that the caller on the other side cannot hear you.

Select a call list and select 'Mute'.

When a call is ended, 'Mute' function is automatically released.

#### [Contacts]

You can search the contacts during a call.

#### [SMS Function]

When this function is used during a call, you can send/SMS without handing up a call.

#### [Conference Call]

This function is available when a network service is provided. Up to 6 people can talk at a time.

For more details, please contact your service provider.

#### [Private Call]

While using Conference Call function, you can use this function to talk to a specific person.

#### [Sending Out My Phone Number]

This function comes very convenient when you need to enter your phone number for paging or ARS calls.

#### [Using Menu Function]

Menu function can be used during a call. However, the available menu function during a call is limited.

For more details, refer to Menu Tree on page 55.

#### [Volume Adjustment During a Call]

You can adjust the volume during a call using button located on the side of your cellular phone.

The volume can be adjusted in five steps.

#### Missed Calls

Missed calls are displayed with the Caller's phone number.

Press we key to exit Missed Call window.

Missed call phone number can be edited, stored or deleted. For more detail, refer to Call History on page 69.

You can adjust the conversation volume using button located on the side of your cellular phone during a call.

In standby mode and press button on the side of the cellular phone to adjust the button volume.

Press UP button of key to increase the volume. Press down button of key to decrease the volume.

For more information on ringtone and volume refer to phone setting on page 81.

This function puts the cellular phone into Manner mode. Bell tone and button sound are changed to vibration, ramp blinking and Manner mode.

In areas where etiquette is required, such as public area, concert hall, lecture hall and conference room, this function is convenient

Hold down \*\* key to setup Manner Mode.

Hold down \*\* button again to release Manner Mode.

When Manner Mode is configured, I icon is displayed on the screen

When Manner Mode is set up, schedule/anniversary/alarm/ message are notified through vibration.

When the cellular phone is turned off in Manner Mode, the cellular phone stays in Manner Mode when it is turned on later.

Ear-microphone frees your hand during a call.

To use ear-microphone, insert the ear-microphone into earmicrophone slot on the side of the cellular phone.

### Standby Screen Function

Run the standby screen function using ... and ... keys.

The left soft key executes function that left bottom line of the display.

#### [Move]

This function moves a selected phone number from the cellular phone to SIM card, and vice versa.

Standby Mode → ··· → Select a phone number → ••• → Number 6

## Character Input Mode

#### 9 Mode

This mode allows you to enter English words with only one keypress per letter.

Each key on a keypad has more than one letter a single press on the 5 key could be J, K or L. The T9 mode automatically compares your key presses to an internal linguistic database to determine the correct word. This mode is based on a builtin dictionary.

This mode requires far fewer keystrokes than the traditional multi-tap method.

#### **Typing English Words**

To type a word, press keys corresponding to the letters you need. Remember the following as you are typing:

- Press key on the phone just once per desired letter. For example, to enter 'hello', press the following keystrokes: 4.3.5.5.6.
- 2. The word you are typing appears in the display. It may change with each key you press.
- 3. Press the \*\* key, you can display alternate word choices for the keys that you have pressed.
- 4. Complete each word with a space by pressing the 💇 key.

5. If the word that appears in the display is not the word that you desire, press the one or more times to display alternate word choices for the keys you have typed. (For example, 'of' and 'me' both share the sequence 6, 3) The phone displays the most commonly used choice first.

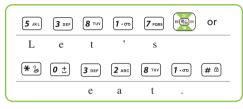

This mode displays all the words which are containing the letters you have entered. By doing this, the T9 mode saves you typing extra keypress.

#### **Smart Punctuations**

Full stop, hyphen and apostrophe are available on the 1 key. The T9 mode applies rules of grammar to insert the correct punctuation.

Notice that the 1 key is used twice in this example to display two punctuation marks:

#### Shifting a Case

To change the case in T9 mode, press the one way. Lower case, Capital lock and Initial capital are available.

#### Scrolling

The key scrolls to the alternative characters corresponding the keypress.

To view your message without moving the cursor, press  $^0_{\Theta}$  keys on the left side of the phone.

To move the cursor left or right through your text message, press the key. Note that pressing the key without completing a word by the 0 key displays the alternative word.

#### **Clearing Characters**

Press the ... key one or more times to remove characters from the text area.

#### **ABC Mode**

When typing in ABC mode, you should press numbers key labeled with the required character:

- Once for the first character.
- Twice for the second character and so on.

For example, you press the 2 key three times quickly to display the character "C", the 5 key three times quickly to display the character "L".

So, this method is called Multi-tap typing.

The cursor moves to the right when you press a different key.

When entering the same character twice (or a different character on the same key), just wait for a few seconds for the cursor to move right automatically, and then select the next character.

Refer to the table on page 50 for the list of characters assigned on each key.

#### Shifting a Case

To change the case in ABC mode, press the \*s key. Lower case, Capital lock and Initial capital are available.

#### Scrolling

To view your message without moving the cursor, press keys on the left side of the phone.

To move the cursor left or right through your text message, press the key. Note that pressing the key without completing a word by the 0 key displays the alternative word.

# ••••••

#### **Clearing Strokes and Characters**

Press the ... key one or more times to remove characters from the Text Area.

For list of characters available see table

Key	Characters in the	Order Displayed		
Rey	ABC	abc		
1.00	.,?!1-/@	. , ? ! 1 – / @		
<b>2</b> ABC	A B C 2	a b c 2

<b>5</b> JKL	J K L 5	j k 1 5		
<b>6</b> MNO	MNO6	mno6		
7 PQRS	PQRS7	pqrs7		
<b>8</b> TUY	T U V 8	tuv8		
9 wxyz	WXYZ9	wxyz9		
(0 ±	□0 *<>% # £	□0+()&_\$		

#### Numeric Mode

Numeric mode is indicated by 123. It enables you to enter numbers into a text message. Press number keys corresponding to the desired digits.

#### Symbolic Mode

Symbolic mode enables you to enter symbols into a text message.

To scroll through the available symbol categories, press the key. When you see the desired symbol on the display, press the appropriate number key (1 to 6) to insert the symbol. The phone automatically switches back to the text entry mode used just prior to selecting Symbolic mode.

### Changing Text Input Mode

When you are in a field that allows characters entry, you should notice the text input mode indicator in the display.

- To change to another text input mode:

  1. Press the key repeatedly until you find the desired input mode.
- 2. Press the 📆 key. You will see the text input mode indicator in the top line of the display.
- T9 mode > T9 ABC (T9 Abc, T9 abc)
- ABC > ABC (Abc, abc)
- Simplified Chinese > Pinyin
- Traditional Chinese > Stroke
- Numeric > 123
- Symbol > Symbol

Directions for using each of the text input modes appear later in this chapter.

You can also change the text input mode by pressing the key repeatedly in text entry screen. Each time you press the Abelian key, the mode is changed in the following order:

T9 ABC (T9 Abc, T9 abc) > ABC (Abc, abc) > Pinyin > Stroke > 123 > Symbol

# **■** Safety Information

#### **Password Input**

There are several passwords that are used by your phone and its SIM card. These passwords help you protect your phone against unauthorized use.

#### Phone Password

The phone password is used for unlocking the keys, deleting all Phonebook entries, restoring the factory setting, and locking or unlocking the phone. If the Phone Lock feature is enabled, you must enter the password each time the phone is turned on.

This password can be used to avoid unauthorized use of your phone. The password is usually preset to "0000".

#### PIN Code

PIN(Personal Identification Number)code protects your SIM card against unauthorized use. The PIN code is usually supplied with the SIM card. When the PIN code request is enabled, the code is asked each time the phone is switched on.

If you key in incorrect PIN code three times in succession, the phone will lock and you will be required to enter a PUK code. When you enter a new PIN code, you will have no enter your new password twice to confirm correct.

#### PIN2 code

Some SIM cards are provided with a PIN2 code. To use a function this code may be required. The use of this code requires the support of the SIM card.

If you key in an incorrect PIN2 code three times in succession, enter the PUK 2 code and then press the & key.

When you enter a new PIN2 code, you will have to enter it twice for confirmation and then press the key.

#### PUK code

The PUK (Personal Unblocking Key) code is used for changing a blocked PIN code. This code is usually supplied with the SIM card, if not contact your service provider.

If you key in an incorrect PUK code ten times in succession, the SIM card will become void and you must obtain a new card. As the PUK code cannot be changed, contact your service provider if you forget the code.

#### PUK2 code

The PUK2 code, supplied with some SIM cards, is required to change a blocked PIN2 code. If you key in an incorrect PUK2 code ten times in succession, you cannot use the functions requiring the PIN2 code. Contact your service provider for a new card. You cannot change the PUK2 code. If you lose the code, contact your service provider.

#### **Barring Password**

The 4-digit barring password is required when you use the Call Barring function. You can obtain the password from your service provider when you subscribe to this function.

# Using the Batteries

The battery provided with the phone is a Lithium slim battery.

#### **Precautions When Using Batteries**

- Never use any charger or battery that is damaged in any way.
- Use the battery only for its intended purpose.
- If you use the phone near the network base station, it uses less power; talk and standby times are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.
- •Battery charging times depend on the remaining battery charge, the type of battery, and charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When the operation time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.
- •If left unused, a fully charged battery will discharge itself over time.

- Use only approved batteries and recharge your battery only with approved chargers. When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for more than a week, since overcharging may shorten its life.
- Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first.
- Do not leave the battery in hot or cold places, such as in a car in summer or winter conditions, as you will reduce the capacity and life-time of the battery. Always try to keep the battery at room temperature. A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Li-ion batteries are particularly affected by temperatures below 0°C (32°F).
- Accidental short circuiting can occur when a metallic object (coin, clip or pen)causes a direct connection between the + and - terminals of the battery (metal strips on the back of the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuit.
- Dispose of used batteries in accordance with local regulations. Always recycle. Do not dispose of batteries in a fire.

# ■ Safety Information

#### Traffic Safety

Do not use a hand-held mobile phone while driving a vehicle. If using a hand-held phone, park the vehicle before conversing. Always secure the phone in its holder, do not place the phone on the passenger seat or where it can break loose in a collision or sudden stop.

The use of an alert device to operate a vehicle lights or horn on public roads is not permitted.

#### Remember, road safety always comes first!

#### **Operating Environment**

Remember to follow any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it, or when it may cause interference of danger.

When connecting the phone or any accessory to another device, read its users guide for detailed safety instructions. Do not connect incompatible products.

As with other mobile radio transmitting equipment, users are advised that for the satisfactory operation of the equipment and for the safety of personnel, it is recommended that the equipment should only be used in the normal operating

position (held to your ear with the antenna pointing over your shoulder).

#### **Electronic Devices**

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your mobile phone.

#### **Pacemakers**

Using the phone within 6 inches (20cm) may cause a potential interference with a pacemaker.

#### Persons with pacemakers:

- Should always keep the phone more than 6 inches (15cm) from their pacemaker when the phone is switched on.
- Should not use the phone near around their chests.
- Should use the ear opposite the pacemaker to minimize the potential for interference.
- If you have any reason to suspect that interference is taking place, switch off your phone immediately.

# WK2000

#### Hearing Aids

Some digital mobile phones may interfere with some hearing aids. For more information, contact your service provider.

#### Other Medical Devices

Electromagnetic waves generated from the cellular phones may dangerously affect medical devices. Switch off your phone in health care facilities in accordance with their regulations.

#### Car

Electromagnetic wave signals may affect improperly installed or inadequately shielded electronic systems in a car. Check with the manufacturer regarding your car before using your phone.

#### **Potentially Explosive Atmospheres**

Switch off your phone when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Users are advised to switch off the phone while at a refueling point (service station). Also switch your phone off when you

are below deck on boats; in chemical transfer or storage facilities and in vehicles using liquefied petroleum gas as the air may contain chemicals or particles such as grain, dust or metal powders.

#### Vehicles

Only qualified personnel should service the phone, or install the phone in a vehicle. Faulty installation or service may be dangerous.

Check regularly that all mobile phone equipment on your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.

Do not install your mobile phone equipment near an air bag. If the air bag inflates, your phone may be damaged.

Switch off your phone before boarding an aircraft. The use of mobile phones in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network and may be illegal.

Failure to observe these instructions may lead to the suspension or denial of telephone services to the offender, or legal action, or both.

**Emergency Calls** 

#### Important!

This phone, like any mobile phone, operates using radio signals, wireless and landline networks as well as user-programmed functions that cannot guarantee connection in all conditions. Therefore, you should never rely solely upon any wireless phone for essential communications (for example, medical emergencies).

Remember, to make or receive any calls the phone must be switched on and in a service area with adequate signal strength. Emergency calls may not be possible on all wireless phone networks or when certain network services and phone features are in use. When you cannot use this function, contact your local service provider.

#### To Make an Emergency Call:

- 1. If the phone is not on, switch it on.
- Key in the emergency number for your present location (for example, 999 or other official emergency number). Emergency numbers vary by location.

3. Press the SOS key. If certain features are in use (key guard, restrict calls, etc.), you may first need to turn those features off before you can make an emergency call. Consult this document and your local cellular service provider. When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your phone may be only means of communication at the scene of an accident-do not cut off the call until given permission to do so.

# Care and Maintenance

Your phone is a product of superior design and craftsmanship and should be treated with care. Carefully read the following information:

- Keep it and all its parts and accessories out of small children's reach.
- Keep it dry. Precipitation humidity and liquids contain minerals that will corrode electronic circuits.
- Do not use or store it in dusty, dirty areas.
- •Do not store it in hot or cold areas. High or low temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store it in cold areas. When the phone warms up (to its normal operating temperature), moisture can form inside the phone, which may damage the phone.
- Do not drop, knock or shake it. Rough handling can break internal circuit boards

- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean it. Wipe it with a soft cloth slightly dampened in a mild soap and water solution.
- Do not paint the phone. Paint can clog the devices moving parts and prevent proper operation.
- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications of attachments could damage the phone and may violate regulations governing radio devices.
- If the phone, battery, charger, or any accessory is not working properly, take it to your nearest qualified service facility.

# Glossarv

#### **Airtime**

Actual time spent talking on the wireless phone. You are billed according to this reference.

#### **Antenna**

A device for transmitting or receiving signals. The size and shape of antennas is determined, in part, by the frequency of the signal they receive. Wireless phones and the base station must have antennas.

#### **ALS (Alternate Line Service)**

ALS provides the capability of associating two alternate lines with one SIM card. You can make and receive calls on either line as desired with this service.

#### Call Barring

Ability to restrict outgoing and incoming calls.

#### Call Divert

Ability to reroute calls to another mobile or fixed line.

#### Call Holding

Ability to put one call on standby while answering or making

another call; you can then switch between the two calls, as required.

#### **Call Waiting**

Ability to inform users that they have an incoming call when engaged on another call.

#### **CLI (Caller Line Identification) Service**

Service allowing subscribers to view or block the telephone numbers of callers.

#### **Conference Calling**

Ability to establish a conference call involving up to five additional parties.

#### DTMF (Dual-tone Multi Frequency)

You send DTMF signals when you enter numbers by pressing the digit keys.

#### Hands-Free

A feature that permits a driver to use a wireless phone without lifting or holding the handset an important safety feature for automobiles, tractors and most other motorized vehicles.

# VK2000

#### **GSM (Global System for Mobile Communication)**

International standard for cellular communication, guaranteeing compatibility between the various network operators. GSM covers most European countries and many other parts of the world.

#### LCD (Liquid Crystal Display)

Commonly used to refer to the screen display on the wireless phone.

#### **LED (Light Emitting Diode)**

Commonly used to refer to a small light on the wireless phone or on the Desktop Charger. The lights on the charger indicate that battery charging is taking place.

#### PIN (Personal Identification Number)

Security code that protects the phone against unauthorized use. The PIN is supplied by the service provider with the SIM card. It may be a four to eight-digit number and can be changed, as required.

#### **PUK (PIN Unblocking Key)**

Security code used to unlock the phone when an incorrect PIN has been entered three times in succession. The eight-digit number is supplied by the service provider with the SIM card.

#### Roaming

Use of your phone when you are outside your home area (when traveling for example).

#### SIM (Subscriber Identification Module)

A card containing an integrated circuit. The circuit contains the information about the phone operation.

#### SMS (Short Message Service)

A network service sending and receiving messages to and from other persons without the need to call. The incoming messages immediately appear on the display, and you can edit, receive and send the messages.

The function of this key:

- Varies according to the function that you are currently using.
- Is indicated on the bottom line of the display just above the corresponding key.

#### Voice Mail

When you cannot be reached, you can record your voice using this function.

#### Wireless

Receives signals. There is not need to connect using a physical connection, such as a metal wire (copper) or fiber optic cable.

For more details, contact your local service provider. There may be some differences between the phone and user manual.
