## 2. Getting started

### 2.1 Removing the back cover

### 2.2 Inserting the UIM card (Operator dependent)

The mobile phone can only be used with the UIM card inserted. Press and hold the  key. Insert the UIM card with the metallic contact downwards, sliding it into the slot as shown by the arrow, paying attention to the position of the slanted angle. To remove the UIM card, slide the card out in the direction shown.

## 2.3 Installing / Removing the battery

Remove the back cover and remove the battery as shown (direction of the arrow).

## 2.3 Charging your phone

Attention: the phone will emit a low warning tone 20 minutes before the power runs out completely.

# 3. Basic functions

## 3.1 Switch-on/off

When power is sufficient, press and hold the  key to switch on. If you have activated a password or a PIN code, you will be prompted to enter it. Normally the phone is ready for use as soon as you enter the password or the PIN code. For details on the use of the PIN code and password, please refer to Menu/Settings/Security settings. When the phone is on, press and hold the key  to turn it off.

## 3.2 Making a call

### 3.2.1 Entering the number directly

In the standby mode, use the number key to enter a phone number, then press the

Key  to make the call.

### 3.2.2 Dialling a number in the Call Memory

In the standby mode, press the key  to access the Call Memory, and press this key again to dial the selected number.

### 3.2.3 Speed dialling

In the standby mode, make a long key press on keys 2 to 9 to speed-dial a number. If you have not set the number for speed dialling, the phone will display "Speed dial is empty". Press the left soft key to access the "Contact" and select speed dial. For details regarding speed dial setting, please refer to "Contacts/Speed dial".

### 3.2.4 Emergency call

Enter 911 or a different emergency number, and then press the  key. In any situation, with or without the PIN lock activated, your phone can still make an emergency call.

### 3.3 Functions available during a call

During a call, access the Menu by pressing the  key.

### 3.4 Input mode

The text input mode is used when you need to save contacts, to search a contact or to edit a SMS and other text input circumstances.

#### 3.4.1 Text input operating sequence

Select the Text input method.

Enter the text.

You can change the input mode while entering the text.

#### 3.4.2 Changing the text input method

In the text input mode, press the "#" to change the input method. Press the "\*"key to switch from the upper case to the lower case characters when you need.

#### 3.4.3 Text input methods

The phone includes four text input methods: Es, T9Es, English, T9English and numbers.

#### 3.4.4 Introduction to the input method

##### Inserting punctuations and special symbols

When you are editing a text using the Es and English input mode, press key “1” to select the punctuation mark or a special symbol or press and hold “\*” to access the symbol table. In the number input mode, press “\*” to insert a “\*”, and press and hold the “\*” key to access the table of symbols.

##### English input method

The English characters are shown on the keypad keys

As soon as you insert letters in sequence to form a word, the word is automatically spelled out. If this word is not the one you expect, use the up and down keys to select the required word. Press the \* key and confirm if you want to the first letter of the word to appear in capital. Press “0” to insert a space.

##### Note:

We provide over 20,000 commonly used English words. If you correctly entered the characters and cannot find the suitable word with the navigation key, you may insert it by using English input method, repeatedly pressing the relevant key until the right letter inserted.

b) The “\*” key is used to switch between lower case, only the first letter in upper case or all characters in capitals.

Character input method (subdivided into upper case and lower case modes)

Single characters or numbers can be entered. Their distribution on the key pad is shown below:

0	0
1	1, commonly-used symbols
2	a, b, c, A, B, C, 2
3	d, e, f, D, E, F, 3
4	g, h, i, G, H, I, 4
5	j, k, l, J, K, L, 5
6	m, n, o, M, N, O, 6

7	p, q, r, s, P, Q, R, S, 7
8	t, u, v, T, U, V, 8
9	w, x, y, z, W, X, Y, Z, 9

Number input method (123)

Press the number key to enter the corresponding number, press "\*" to enter "\*".

## 4. Display

**Wallpaper:** Choose the wallpaper and set it as main screen.

**Style:** Choose a scheme of display. There are 6 available styles for you to choose

**Backlight time:** Set the backlight time - 10 sec.30 sec.50 sec. always switch on

The phone displays "out of network" or "network failure".	<p>Check if you are in an area where the signal is weak (in a tunnel or surrounded by building). Move to another location and try again.</p> <p>Make sure you are not trying to use a service that you haven't subscribed to. If you require this service, contact the network for details.</p>

FAQ	Item to be checked
When you cannot connect to the network normally	<p>(1) The network provider does not provide this service or you have not subscribed to this service. Please contact your provider for details on the subscription and use of these services.</p> <p>(2) Incorrect setting. Please set the correct parameters</p>

## 14. Safety and use

Please read carefully and observe the following regulations to avoid damaging your telephone or using it against the law.

Electronic devices/Health care facilities.

Turn off your phone when you are near high-precision electronic devices in use to avoid causing malfunction or interfering with their operation (fire alarms, automatic doors and automatic control equipment).

Turn off your phone in hospitals or places where the use of mobile phones is restricted. Mobile phones affect the normal operation of electronic devices and medical instruments, such as pacemakers, hearing aids and other electronic medical devices.

Pacemaker manufacturers recommend that mobile phones are kept at least 15 cm away from pacemakers to prevent the phone interference. When using the phone, you should hold it against the ear on the opposite side to the device, to reduce interference.

Mobile phones should be forbidden inside an operating theatre, Intensive Care Unit (ICU) or Cardiac Care Unit (CCU).

Pay attention to the settings of the sound volume and the vibration to avoid disturbing the patients.

Flammable or explosive areas

Turn off your phone near flammable or explosive areas. Do not install/remove or charge the battery or use the phone in these areas to prevent any explosion or fire. Flammable and explosive areas include: chemical plants, facilities with chemical substances or particles in the air (grains, dust and metal powder ), petrol stations and fuel depots, fuel storage areas (for example, under a ship's deck), areas with explosion warning signs, areas with "turn off two-way radio equipment" signs and places where you are usually recommended to switch off

car engines.

#### Safety of use in a vehicle

Please observe the relevant local or national regulations related to the use of mobile phones in a vehicle. Please refrain from using the phone while driving. If you are driving and need to use the phone in an emergency, use a hands-free device (optional purchase) to be safe. Otherwise, park the car before using the phone.

Do not place your phone on the dashboard or within an airbag deployment area to avoid causing injury to passengers in the car when the bag inflates or bursts.

Using the phone on an airplane is strictly forbidden. Turn off your phone before you board an aircraft. It is recommended to remove the battery to avoid the phone being turned on accidentally.

#### Storing environment

To avoid demagnetizing problem, keep the phone away from magnetic materials, such as magnetic discs and credit cards.

Ensure that the phone does not come into contact with liquids. If it does, turn it off immediately, remove the battery and quickly contact the vendor.

Do not store the phone, battery or charger in an environment with a strong magnetic field, such as an electromagnetic pot or a microwave oven, to avoid causing the phone to malfunction, catch fire or explode.

Do not subject the phone, battery or charger to heavy impact or vibration to avoid battery leakage, phone malfunction, overheating, fire or explosion

Do not place sharp metallic items such as needles, near the receiver because the receiver will attract them and you may be injured when using the phone.

Do not place the phone in the back pocket of your trousers or skirt to avoid damaging it when you sit down

#### Child health

Keep the phone, battery and charger out of the reach of children. Do not let children use the phone, battery or charger without supervision.

Do not let a child put a battery in his/her mouth to avoid electrolyte poisoning.

Keep children away from small phone accessories to prevent suffocation or blocking of the oesophagus as a result of swallowing.

### Operating environment

This phone is equipped with a built-in antenna. When the phone is on, unless necessary, do not touch the antenna area (top of the phone) for optimal communication quality.

Do not use your phone while it is being charged during thunderstorms, or use it outdoors to avoid being struck by lightning or other injury.

Do not use your mobile phone in dusty, wet, dirty places or places near magnetic fields to prevent malfunction of its internal circuits. Keep the phone as dry as possible. Keep the phone, battery and charger away from water and water vapour and do not clean the phone with a wet cloth to avoid short circuits, malfunction due to corrosion and electric shocks.

Do not turn in or off the phone against your ear to avoid your ears and body from being impaired.

To comply with regulations on radio frequency exposure, keep the antenna at least one inch (2.5 cm) away from your body when holding your phone or using its data functions.

If you feel unwell (epileptic seizures or blackouts) after playing the games with your phone for a long period of time, please seek medical assistance immediately.

Move your mobile phone away from your ear while using the hands-free mode, because the amplified volume might cause hearing damage.

Make sure you switched off your phone in areas where mobile phone use is prohibited!

### Cleaning and maintenance

Switch off the phone before cleaning and maintenance. The charger should be unplugged from the power socket and the phone and charger disconnected to prevent any electric shock or short circuiting of the battery or charger.

Do not wipe the phone or charger using chemical substance (alcohol benzene), chemical agents or abrasive cleaning agents to avoid damaging its parts or causing a malfunction. You may clean with a slightly damp anti-static soft cloth.

Do not scrape or alter the phone case as paint substances may cause an allergic reaction. If such a reaction occurs, cease using the phone immediately and seek medical help.

Wipe dust off the power plug and keep it dry to avoid risk of fire

If the phone or accessories do not work properly, contact your local vendor

Do not dismantle the phone or its accessories yourself.

### Protecting the environment

Please observe the local regulations on phone packaging, battery and used phone disposal and bring them to the collection point for proper recycling. Do not dispose of used phones or batteries in a household rubbish bin.

Please take your used, unwanted lithium batteries to a designated place. Do not dispose of them in a rubbish bin.

#### Emergency call

In an emergency situation, if the phone is on and you are within the network range, it can be used to make an emergency call. However, emergency call numbers may not be reachable on all networks; you should never rely on your mobile phone for emergency calls.

#### Using the battery/charger

Only use batteries and chargers approved by the manufacturer. Do not use batteries or chargers that are not compatible with your model to avoid any explosion.

Do not throw a battery in a fire as it might catch fire or explode. Do not cause a short circuit to the charger as it might result in malfunction, smoke or fire.

Do not place conductors like metals, keys or jewels, against the battery poles or allow them to touch the ends of the battery to avoid short circuiting the battery and causing injury (burns, for example) as a result of battery overheating

If the power cable is damaged (wires exposed or broken) or the connection to the plug is loose, do not use it to avoid electric shock, short-circuit of the charger or a fire.

Do not dismantle the battery or weld the two poles of the battery to prevent the battery from leaking, overheating, catching fire or exploding.

Keep the charger away from any container of water or other liquids. Infiltration of liquid may cause electric leakage or other malfunction to the charger.

If the battery leaks, emits smoke or a strange odour, cease use immediately and move it far away from naked flames or people to avoid a fire or injury from explosion.

Do not charge the battery in a dusty or damp environment and keep the cable away from heated objects.

The battery is not fully charged when leaving the factory. Therefore, you should charge the battery for two hours before use. Before charging, make sure the charge plug is correctly inserted in the power socket. If it is incorrectly inserted, electric shock might occur and the phone or battery may catch fire or explode. When charging is completed, pull out the charger plug from the power socket, and do not pull the cable.

If the liquid in the battery splashes into your eyes, do not rub the eyes to avoid damaging your vision, rinse the eyes immediately in clean water and go to a hospital for assistance.

Do not place heavy objects on the charger cable. Do not damage, twist or pull the cable to avoid causing electric shock or fire.

When the battery cannot be installed correctly in the phone, do not press down on it heavily to

prevent it from leaking or exploding. Do not remove the battery when the phone is on.

If the battery is distorted, has changed colour or is unusually hot when charging or when it is stored, remove immediately the battery and stop using it or it may leak, become overheated, explode or catch fire.

If a battery is not used for a long period of time after charging, store it at room temperature

Do not touch the power socket, power cable or charger with wet hands to avoid electric shock.

If water or other liquid enters the charger, immediately disconnect the charger plug from the power socket to prevent it from overheating, catching a fire or malfunction.

Explanation: The instructions in this user manual apply to Traditional Chinese language mode. In other language operating modes, slight differences may appear.

Warning: The manufacturer disclaims any liability for damage, which may result as a consequence of improper use of this mobile phone or use contrary to the instructions contained in this manual.
