Pay extra attention to direction of polarity.

Slide the battery compartment cover back

Slide down to open the battery compartment cover.

1. Use only the supplied NiMH rechargeable batteries.

2. Place the 2 supplied AAA rechargeable batteries as indicated.

4. Put the handset on the base and charge for 15 hours before

using the handset for the first time. The handset will give a beep when it is properly placed on the base or charger.

2. If the handset will not be used for a long time, disconnect and remove the batteries to prevent possible leakage.

1. Plug one end of the telephone line cord into the telephone

2. Plug the small end of power adapter into a power jack on

Connect the power supply plug to the base jack

horizontally, and route the power supply cord through

4. Plug the large end of power adapter into a wall power outlet.

If you have broadband service, a micro-filter (not included) is required

### 3.3. Connecting the Charger(s) (for Duo/Trio models) Plug the power adapter into mains socket.

# If you have a Broadband line

filters, contact your broadband supplier.

If you connect your telephone to a line with a broadband connection, you will need to insert a micro-filter between the telephone and the telephone line, otherwise you may get interference between the telephone and the broadband, which

could cause problems. In a home with broadband, every telephone must have a microfilter connected, not just the one at the telephone point that your modem is connected to. If you need more broadband micro-

# 2. PRECAUTIONS

The signal quality will depend on the location and environment of Position your **Versatis F200/Versatis F250** away from sources

of excessive heat (radiators, direct sunlight, etc.) and protect it from vibrations and dust. Never allow your telephone to come into contact with water or other liquids, or with aerosols. To reduce the risk of interference and optimize reception, take particular care not to install the base in the immediate vicinity of windows, large metal objects, reinforced concrete, televisions, music centres, VCR or DVD players, halogen lamps or heating devices, fluorescent lighting, burglar alarms, microwave ovens, computers, etc.

This telephone requires an electrical power supply in order to function.

To clean your Versatis F200/Versatis F250, use an antistatic cloth lightly moistened with water.

NB: Your **Versatis F200/Versatis F250** is a DECT™\* standard appliance designed to receive and transmit telephone calls. It is designed for connection to the public telecommunications network.

# 4. USING YOUR PHONE

Operating Temperature From 5°C to 40°C \* Values may vary according to environment. \*\* Depending on initial battery charge.

### 10. TROUBLESHOOTING

If you have difficulty with your phone, please try the suggestions listed below.

As a general rule, if a problem occurs, remove the batteries from all the handsets in your installation for about 1 minute, then disconnect and reconnect the power supply to the base and reinstall the handset batteries.

Problem	Cause	Solutions	
No dialing tone when pressing  key	a. The connection cord of the base station is not plugged in.	a. Check the connections. Unplug and plug back in the mains. Check that the telephone line cord has been plugged into the base station and the phone socket.	
	<ul> <li>b. The adapter cord is not plugged in correctly in the base station.</li> <li>c. The line is busy, as another handset is</li> </ul>	<ul> <li>b. Check the base station plug and the AC plug (remove and plug-in).</li> <li>c. Wait until the line is unoccupied.</li> </ul>	
	d. Wrong connection cord.	d. Use the original connection cord.	
"OUT OF RANGE" is displayed.	a. Base station out of range.     b. Base station is not connected to mains.	<ul><li>a. Reduce the range.</li><li>b. Connect base station to mains.</li></ul>	
The call does not work.	Service not activated or wrong operator.	Check your Subscription with network.	
No display. Empty battery.		Recharge battery.	

The store where you bought your telephone can also provide you with information and after-sales support.

# 11. SAFETY

In the event of an electrical hazard, the mains adapter acts as AC power isolating device. It should therefore, as a precaution, be installed close to the appliance and be easily accessible. To disconnect the device from the primary power source, the mains adapter must be removed from the AC socket.

If the mains adapter fails, it must be replaced by an identical model.

If not connected to the mains power or if there is a mains power failure, telephones that use cordless handsets will not work.

You will then be unable to make or receive calls in the event of an emergency.

This is why we recommend that you also keep a conventional telephone - one that doesn't require a power supply - as a backup.

### ! Do not use your telephone to notify a gas leak when standing in the vicinity of the leak.

It is recommended that you avoid using this device during electrical storms.

Do not attempt to open the batteries, as they contain chemical substances. In the event of leakage, avoid contact with the skin, eyes, nose and mouth. In the event of contact, rinse the affected part for about twenty minutes with running water and seek urgent medical attention. Clean the product with absorbent paper or a dry cloth and contact your reseller for replacement batteries.

# 12. ENVIRONMENT

This symbol means that your inoperative electronic appliance must be collected separately and not mixed with the household waste.

This appliance has been designed and manufactured with high quality materials and components that can be recycled and reused. Electrical and electronic appliances are liable to contain parts that are necessary in order for the system to work properly but which can become a health and environmental hazard if they are not handled or disposed of in the proper way. Consequently, please do not throw out your inoperative appliance with the household waste.

If you are the owner of the appliance, you must deposit it at the appropriate local collection point or leave it with the vendor when buying a new appliance.

- If you are a professional user, please follow your supplier's instructions.
- If the appliance is rented to you or left in your care, please contact your service provider.

Keen to preserve the environment, ATLINKS has equipped this appliance with a switching power supply, offering better energy efficiency. The advantages include not only very low electricity consumption, but also a more compact format than the conventional power supply units used by the previous range.

The used batteries from your telephone (if it has batteries) must be disposed of in compliance with current environmental protection regulations. Comply with your local regulations. Return your batteries to your reseller or dispose of them at an approved recycling centre.

Help us protect the environment in which we live!
