mileage warranty

Excellent fuel efficiency

** MPG figures are meant only as a guide. Variations can be caused by environmental conditions, rider weight, tyre pressure and many other factors.

PEUGEOT - The name you can trust

**The scooter
that cuts
straight to
the chase**

The Sum Up is a brand new 125cc scooter from Peugeot that cuts straight to the chase in terms of form, function and value. With its twin halogen headlights, alloy wheels and sport profile tyres, from the front the Sum Up is reminiscent of Peugeot's iconic Speedfight scooter.

However this scooter is big on comfort and practicality as well as looks. The broad two-person seat and flat floor pan provide space and comfort for both rider and passenger, while the wide bodywork at the front gives protection from the elements. A generous underseat storage bay and robust metal carry rack boost luggage capacity. Equipped with 13" wheels, this 125cc air-cooled scooter offers an excellent balance between stability and manoeuvrability and at 115 KG it is one of the lightest scooters in its class. It is fitted with both electric and kick start as standard as well as side and centre stand, making parking and starting as easy as possible. The air-cooled 4-stroke engine is frugal and reliable and meets the tough new Euro 3 pollution standards. The 220mm front disc brake delivers dependable stopping power.

The Peugeot Sum Up 125 is the sum of looks and practicality in a package that may even be ridden on L-plates. It is available in the UK in a choice of Night Blue/Metallic Silver and Pearl Black/Metallic Silver.
